Project X

I like the reduced clutter of this approach. However...

It smacks a little of "Mystery Meat" navigation. Whilst it is a fairly common convention now (swipe-left in a list to show the Delete button), the fact remains that a key function isn't visible until the User performs an Action...an Action

David's Feedback – doesn't like this idea, prefers Idea A. Ian agrees and prefers Idea A too.

they may well not be aware of...
