

Zone App ISN | Manage Groups – Add Group

Managing lists of items can be challenging, especially on a

device with a small screen. Since Zone is really all about 1)

Adding new Groups is fast, simple, and intuitive for Users.

Idea There are times when the A–Z Index Control may simply "get in the way". Might it be a good idea to selectively show/hide this control? For example, perhaps when you're

in Group Edit Mode, this control is always displayed, but when you're in Group View Mode (or displaying the Home Screen), perhaps the control should be initially hidden until the user scrolls the list, which would trigger the display of

the control. Then, after a period of inactivity, say one 1 or

2 seconds, the control could be re-hidden.

Home Screen Title

Is it "Home", is it "All", is it "All Contacts", is it "Home

Idea We're using checkbox controls in Group Edit Mode to

When a new Group is created, what should the default name be; e.g. "Untitled", "New", "New Group" etc?

Are we set on the Tap + Hold action as the only way to edit

Ability to Pre-Populate New Groups

automatically populated with any Contacts currently

selected on the Home screen. Are we set on this? Might it

be a little annoying if you had Contacts selected for a different reason, i.e. to perform "standard" Actions on them? Should we do away with this and make things simpler? Should we keep it but add-in a prompt of some

Idea This ISN shows a method by which a new Group is

kind perhaps?

SSM Displayed Only When Needed

SSM is not displayed in Preferences screen because it

do, which is to view or edit the Preferences.

would has no (visible) context to operate within, plus, it

gets in the way of doing what you're currently trying to

SSM displayed in Contact Info view as we want the User to be able to perform "Actions" with the Contact currently being displayed.
